Risk Levels for Trade of Animal Feed and Feed Additives

Report Categories:

FAIRS Subject Report

Approved By:

William Westman

Prepared By:

Mark Petry and Bao Liting

Report Highlights:

On August 27, 2009, the Administration for Quality, Supervision, Inspection and Quarantine (AQSIQ) released Announcement 79, 2009, on “Issuing the Risk Levels and Inspection and Quarantine Supervision Methods for Import and Export Feed and Feed Additives”. The announcement specifies risk categories for certain types of animal feed and feed additives. This report contains an UNOFFICIAL translation of Announcement 79.

Executive Summary:

On August 27, 2009, the Administration for Quality, Supervision, Inspection and Quarantine (AQSIQ) released Announcement 79, 2009, on “Issuing the Risk Levels and Inspection and Quarantine Supervision Methods for Import and Export Feed and Feed Additives”. The announcement specifies risk categories for certain types of animal feed and feed additives. The risk level determines the type of inspection procedure an import will receive upon importation into China. This measure is for immediate adoption.

This Announcement was issued in accordance with AQSIQ Decree No. 118 (GAIN Report CH9071), “Supervision and Management Measures for the Inspection and Quarantine of Import and Export Feed and Feed Additives”.

This measure has not been notified to the WTO.

In addition to Announcement 79, the entry for the United States in the AQSIQ approved catalog of feed and feed additives for importation by countries/regions has been added to the end of this report as an addendum by FAS. The entry was taken from the catalog published on September 15, 2009.

Special thanks go to the Embassy of Australia in China for their assistance in translating part of this report.

General Information:

BEGIN TRANSLATION

Announcement No. 79, 2009: Announcement on Issuing the Risk Levels and Inspection and Quarantine Supervision Methods for Import and Export Feed and Feed Additives

In accordance with the regulations in the Supervision and Management Measures for the Inspection and Quarantine of Import and Export Feed and Feed Additives (AQSIQ Decree No. 118), The Risk Levels and Inspection and Quarantine Supervision Methods for Import and Export Feed and Feed Additives (See Appendix I) is now announced. AQSIQ will adjust and release the risk levels, inspection and quarantine supervision methods in a timely manner according to the risk analysis results. The list of countries and regions for feed imports and the list of feed products types for import will be announced separately. It's hereby announced.

27 August, 2009

Appendix I: Risk Levels and Inspection and Quarantine Supervision Methods for Import and Export Feed and Feed Additives

Addendum A: Entry for United States in September 15, 2009, AQSIQ approved catalog of feed and feed additives for importation by countries/regions

Appendix I: Risk Levels and Inspection and Quarantine Supervision Methods for Import and Export Feed and Feed Additives

Category	Types	Risk Levels	Inspection and Quarantine Supervision Methods for Import	Inspection and Quarantine Supervision Methods for Export
Animal origin feed	Bait use live animal	Level I	Apply for Entry of Animal and Plant Quarantine License prior to import and receive the certification; examine the certification and implement quarantine during import; implement quarantine and supervision of the quarantine and processing takes place after import.	Comply with the requirements of the importing country or region
	Feed use (including bait use) chilled frozen animal products	Level I	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement quarantine during import; implement quarantine and supervision of the processing takes place after import.	Comply with the requirements of the importing country or region
	Feed use (including bait use) aquatic products	Level II	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement quarantine during import.	Comply with the requirements of the importing country or region
	Processed animal protein and fat: Including meat meal (poultry), meat and bone meal (poultry), fish meal, fish oil, fish paste, shrimp meal, squid liver powder, squid powder, cuttlefish paste, cuttlefish powder, fish powder, scallop powder, blood	Level II	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement quarantine during import.	Comply with the requirements of the importing country or region

	meal, blood paddle powder, blood powder, blood cells powder, serum powder, fermented blood meal, animal scraps powder, feather meal, hydrolysed feather meal, hydrolysed hair, protein powder, leather protein powder, hoof powder, angular powder, chicken giblets powder, intestinal membrane protein powder, gelatin, whey powder, milk powder, egg powder, dried chrysalis and its powder, , bone meal, bone ash, bone charcoal, bone DCP, shrimp shell powder, egg shell powder, bone glue, animal light diesel oil, animal fat, feed-grade mixed oil, dried insects and its powder, etc.			
	Pet food and biting plastic	Level II	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement quarantine during import.	Comply with the requirements of the importing country or region
Plant origin feed	Feed grains	Level I	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement quarantine during import; implement quarantine and supervision of the processing takes place after import.	Comply with the requirements of the importing country or region
	Feed seed	Level I	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement	Comply with the requirements of the importing country or region

			quarantine during import; implement quarantine and supervision of the processing takes place after import.	
	Forage crops	Level II	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement quarantine during import.	Comply with the requirements of the importing country or region
	Wheat bran	Level I	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement quarantine during import; implement quarantine and supervision of the processing takes place after import.	Comply with the requirements of the importing country or region
	Bran meal residue (wheat bran excluded)	Level II	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement quarantine during import.	Comply with the requirements of the importing country or region
	Silage feed	Level III	Examine the certification and implement quarantine during import.	Comply with the requirements of the importing country or region
	Processed plant protein and plant powder	Level IV	Implement quarantine during import.	Comply with the requirements of the importing country or region
Mixed feed		Level II	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement quarantine during import.	Comply with the requirements of the importing country or region
Feed with pre-mixed additives	With ingredients of animal origin	Level II	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement	Comply with the requirements of the importing country or region

			quarantine during import.	
	Without ingredients of animal origin	Level IV	Implement quarantine during import.	Comply with the requirements of the importing country or region
Feed additives	With ingredients of animal origin	Level II	Apply for Entry of Animal and Plant Quarantine License prior to import and get the certification; examine the certification and implement quarantine during import.	Comply with the requirements of the importing country or region
	Without ingredients of animal origin	Level IV	Implement quarantine during import.	Comply with the requirements of the importing country or region

Addendum A: Entry for United States in September 15, 2009, AQSIQ approved catalog of feed and feed additives for importation by countries/regions

The United States

Products	Registration situation for foreign producing/processing companies
Milk product for feed use	Approved for imports and gradually complete registration
Pet food	Approved imports from the registered list of companies
Non-ruminant animal derived feed	Approved imports from the registered list of companies
Fish meal and fish oil	Approved for imports and gradually complete registration
crustacean meal (Feng Nian Chong Luang)	Approved for imports and gradually complete registration
DDGS	Approved for imports and gradually complete registration
Wheat bran	Approved for imports and gradually complete registration
Alfalfa hay	Approved imports from the registered list of companies
Soy meal/flour	Approved for imports and gradually complete registration
Cotton seed meal	Approved for imports and gradually complete registration
Cocoa shell	Approved for imports and gradually complete registration
